- **Source FE - Web:** <https://github.com/HongTruongVinh/TechstoreWeb>
- **Source FE - Admin:** <https://github.com/HongTruongVinh/TechStoreAdmin>
- **Description:** Techstore – An e-commerce web application for selling technology products. Customers can browse and search for products, filter products by category and price, register for an account, add items to the shopping cart, place orders, and track the status of their orders. The system also provides an admin dashboard for managing products, categories, brands, users, and orders. Built with ASP.NET Core 8, Angular 17, and SQL Server.
- **Technology:**
  - a. Front-end: HTML, SCSS, TypeScript, Angular.
  - b. Back-end: ASP.NET Core 8, Entity Framework Core.
  - c. Database: SQL Server.
